

Appendix 1: SITE PHOTOS

San Leandro WPCP Treatment Wetland Project

West-facing view of existing storage pond. Portions of the 4.3 acre pond retain water, as shown here. Geotechnical surveys have indicated some contamination, to be addressed with this Project.

North-facing view of bicyclist on the Bay Trail immediately adjacent to proposed Project site.

Exhibit 2: Project Photographs

East-facing view of existing water control structure leading to SFB at south-west corner of site

East-facing view of existing storage pond towards San Leandro's WPCP.

Exhibit 2: Project Photographs

North-west facing view of 4.3 acre storage pond, which currently provides poor habitat quality

North-facing view of the eastern edge of the storage pond, with an EBDA pipeline that periodically discharges to the pond during peak wet weather flows.
